Hazardous Weather

Hazardous Weather

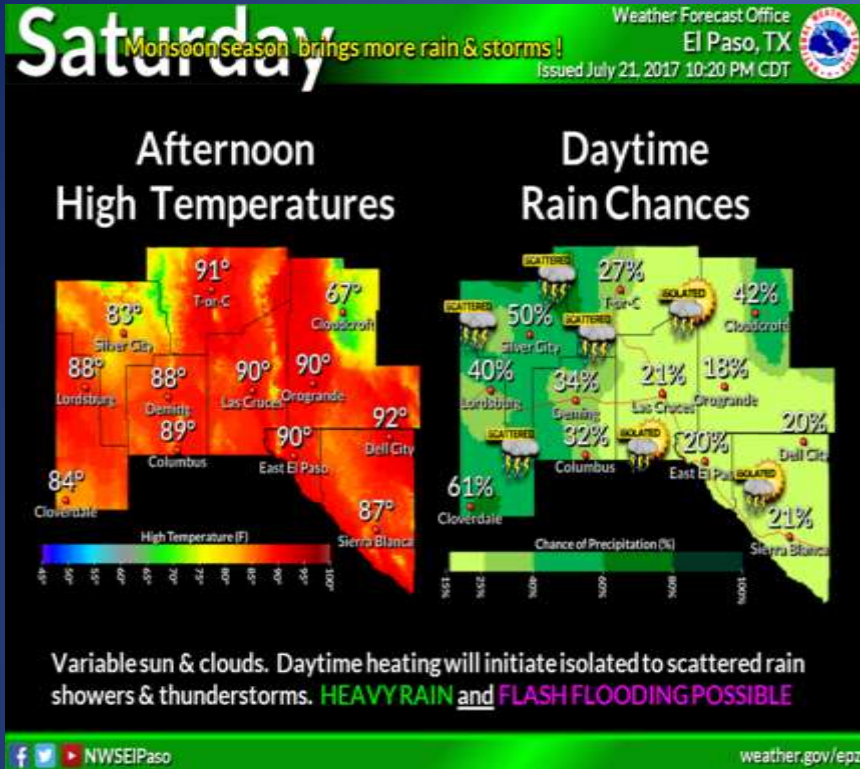

Showers and thunderstorms return to the forecast this weekend. Storms could be slow moving in nature and produce moderate to heavy rain at times. Temperatures will be near to above normal today, and near to slightly below normal on Sunday.

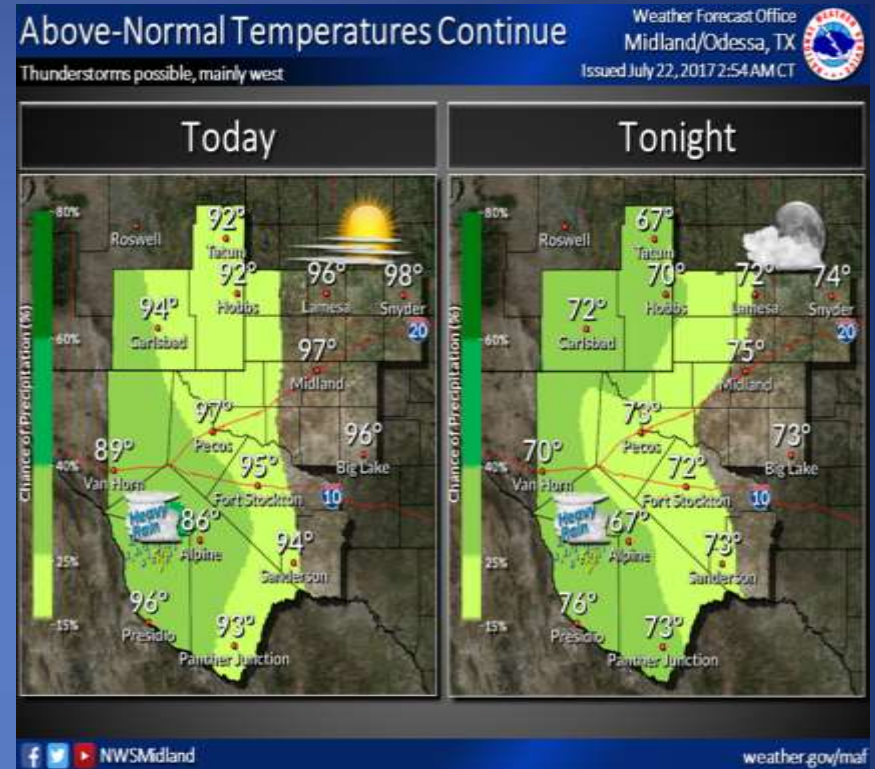

Afternoon storms will once again be possible across the western South Plains, before expanding east to the edge of the Cap rock this evening and overnight. Highs under mostly sunny skies will be in the 90s on the Caprock, to just over 100 in the Rolling Plains.

Hazardous Weather

Monsoon season is in full swing across the Borderland with deep moisture streaming over the region. With daytime heating the atmosphere will once again become unstable with isolated to scattered showers and thunderstorms resulting. Some storms will produce heavy rain with potential for Flash Flooding. Keep an eye to the sky and seek shelter and move to higher ground if storms develop in your area.

Above-normal temperatures are expected again through tonight. Thunderstorms will be possible again, mainly west of the Pecos. These storms may be accompanied by frequent lightning, locally heavy rainfall, gusty winds, and small hail. Localized flash flooding will be the main hazard with stronger storms.

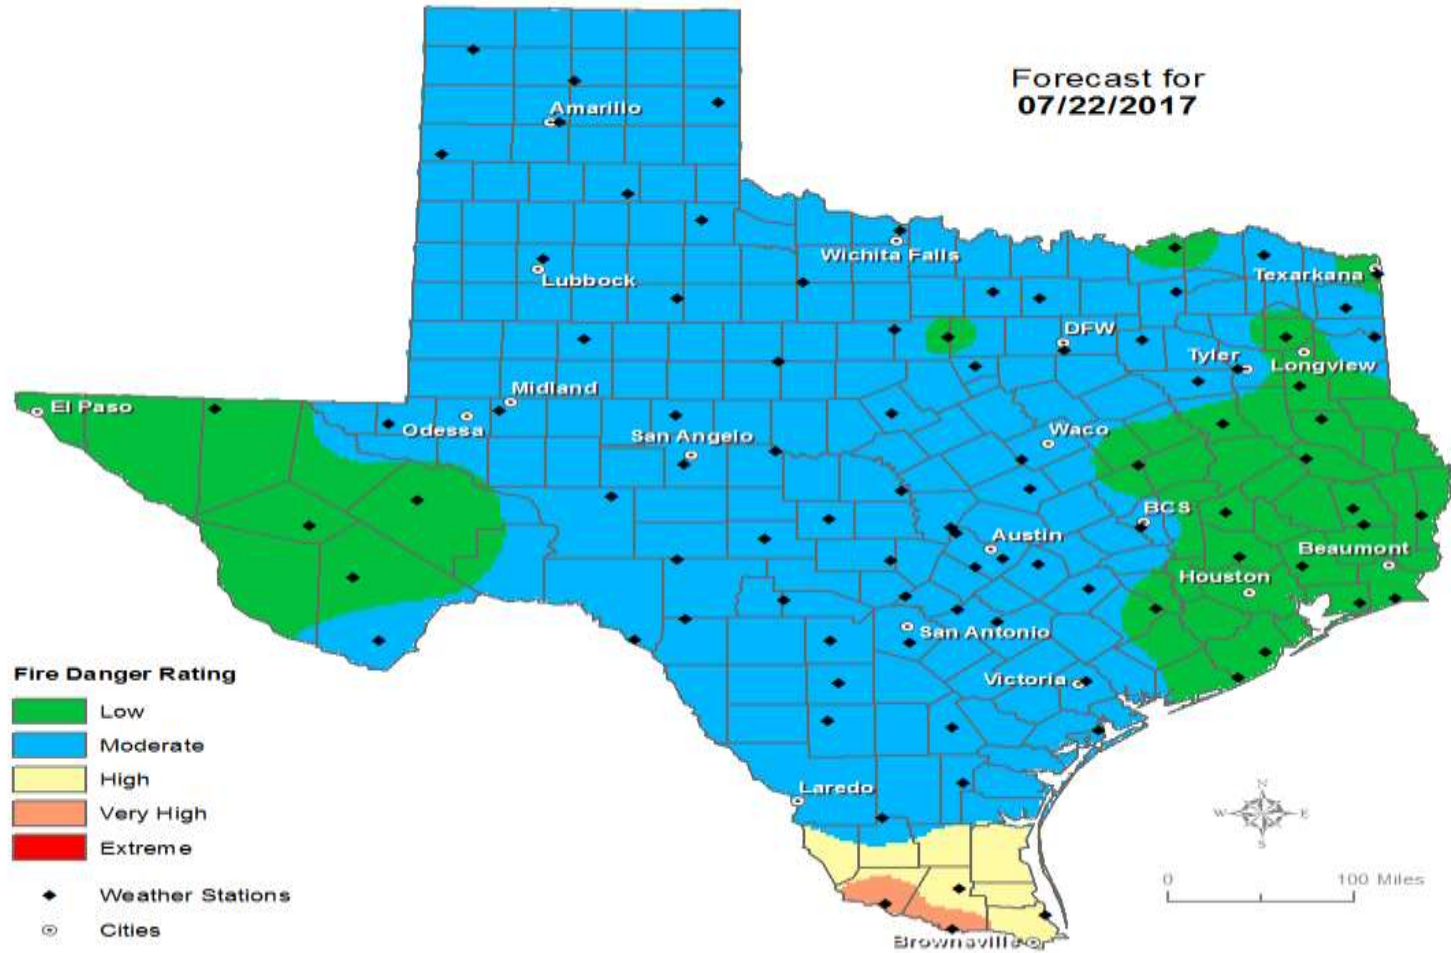

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
07/21/17	Arroyo and Small Stream Flood Advisory	Hudspeth County
07/21/17	Flood Advisory	Andrews, Harris, Waller, Montgomery, Brewster, Gaines, Pecos, Reeves, Ward and Loving Counties
